I have two data sets on a gnuplot, and I only want to plot that after a certain time range. Thanks! A: There are two ways to solve the problem: You can use set terminal postscript to use a postscript file. set terminal postscript \$DateTime = $-(x_{max}-x_{min})/3600$ #To get current datetime in seconds set output "/tmp/result.ps" plot "data.dat" using \$DateTime:(x) title "plot for now" with lines pause 5000 #After 5000 seconds set output "/tmp/result2.ps" plot

```
"data2.dat" using $DateTime:(x) title "plot for  
later" with lines pause 5000 #After 5000  
seconds If you do not want to change the  
terminal, you can only change the x axis (time),  
e.g., using set xrange: set xrange[0:24*3600]  
plot "data.dat" using (-(xmax-$xmin)/3600):(x)  
title "plot for now" with lines pause d0c515b9f4
```
