Owing to its simplicity and safety, the traction test can be used with the same success as physical examination to diagnose adductor tenosynovitis. In professional tennis players this test has replaced invasive and difficult exploratory techniques. It is also valuable in diagnoses of impingement syndrome or a snapping hip. In patients with impingement syndrome, this test can be helpful to determine the most probable site of the entrapment. A thorough physical examination to rule out other causes of anterior knee pain and prevent injury to the knee is always recommended.Q: Custom Token for invoking useState hook I am using useState hook to maintain state in react. For every component the state of a react hook is being maintained using the setState method. However I want to invoke a custom hook where I can set a token with certain conditions and let the useState hook know to keep its state. Something like this: export function useStatePlusToken(initialState, tokenName) { const [state, setState] = useState(initialState); // bff6bb2d33
