I have an unordered list that contains the first element in a box. I need to style the entire list but the CSS rule for the first li works fine as long as the first element in the list is placed inside the li element. Here's the HTML: Title Lorem ipsum dolor sit amet, consectetur adipiscing elit. Dignissimos cumque praesentium dicta, quos tempora, architecto atque ducimus fugit, tempore sapiente. Labore distinctio, quas perferendis repudiandae. Deserunt consequatur. And here is the CSS: .card-container

What's New In Convert Office To Images?

Converts Office files to images for you. conversion of multiple Office files to multiple images. you can also convert powerpoint files to images. Convert multiple Office documents or powerpoint presentations to images in batch. you can also convert other type of files like csv, txt, etc. A free utility that allows you to convert multiple Office file formats to jpg, png, gif, or bmp. full featured conversion tool that allows to convert your office files to various image formats without the need for third party software.Project Summary/Abstract The quality of a dendritic cell (DC) vaccine is a critical determinant of its efficacy as an immunotherapy for the treatment of melanoma. DC immunotherapy in the clinic is based on the preparation of immature DC which can then be matured and loaded with tumor antigens. The standard practice for manufacturing DC vaccines in phase I clinical trials involves culturing patient derived peripheral blood mononuclear cells (PBMC) in the presence of GM-CSF, IL-4 and IFN- γ for six days. For this vaccine to be maximally effective, it must stimulate a robust Th1 immune response. It is currently not known whether the maturation regimen employed for DC vaccines in current clinical trials is sufficient to generate DCs of the required phenotype and therefore the usefulness of the vaccines is currently limited. Indeed, we found that >80% of the cultured DCs in current clinical trials are actually anergic and incapable of activating naive T cells. We have identified a maturation regimen that is able to generate fully functional DCs that are able to effectively activate T cells and thus the data presented in this proposal could have a significant impact on the potential utility of DC vaccines. Furthermore, we have been able to isolate melanoma patient-derived DCs that can be efficiently loaded with a cross-presenting antigen and can be effectively used for the activation of T cells. Our data demonstrate that the inability to generate fully functional DC vaccines is due to an early block in the DC maturation process. In this proposal we will attempt to identify the key regulators of the maturation of melanoma patient derived DCs. We will use the data generated to develop a novel T cell activating DC vaccine and conduct studies on the induction of cancer immunity using these DCs. We will first continue to determine the key regulators involved in the maturation of melanoma patient derived DCs using both genetic and biochemical approaches. We will then investigate

System Requirements For Convert Office To Images:

Supported OS: Windows XP Service Pack 2 or higher Processor: Intel Pentium III Processor 750 MHz or faster Memory: 512 MB of RAM required Video Card: 32 MB of RAM required (256 MB or higher recommended) Graphics Card: Nvidia 6800 GS or higher, or Radeon 9500 or higher Sound Card: Microsoft® Sound System (cannot be installed with MIDI Input)
Hard Drive: Minimum of 600 MB Free Hard Disk Space DirectX®: Version 9.0 or higher
